PROFILE

As an AI engineer, I specialize in developing data-driven solutions with expertise in a wide range of data analysis tools, programming languages, and machine learning techniques. I am proficient in cutting-edge AI technologies, including large language models (LLMs), generative AI, and natural language processing (NLP), enabling me to tackle complex challenges effectively.

WORK EXPERIENCE

Ai pearlz

2025

Junior Ai Engineer

- I have experience as a Junior AI Engineer at AI Pearlz Software House, where I developed data-driven solutions using advanced machine learning techniques and created chatbots to enhance user interactions. Proficient in Python, I am also familiar with Docker and static web development. My role involved leveraging tools like Python to extract meaningful insights and optimize decision-making processes. I focused on solving complex business problems through predictive analytics, data visualization, and creating interactive chatbots, enhancing operational efficiency and driving innovation.

EDUCATION

I completed my intermediate education from Degree College Aliabad, Hunza, securing an A grade. This educational background has equipped me with a strong foundation in both computer science and advanced data-driven technologies.
